

S&P Daily Health Screening Method:

- Upon arrival, staff will wash their hands.
- Upon child's arrival, stand at least 6 feet away from the person dropping off the child and the child.
- Make a visual inspection of the child for signs of illness which could include flushed cheeks, rapid breathing or difficulty breathing (without recent physical activity), fatigue, or extreme fussiness.
- Conduct temperature screening on both child & person dropping off the child: (follow steps below)
 - Perform hand hygiene
 - Wash your hands with soap and water for 20 seconds. If soap and water are not available, use a hand sanitizer with at least 60% alcohol.
 - If you use *non-contact thermometers*, clean them with an alcohol wipe (or isopropyl alcohol on a cotton swab) between each client. You can reuse the same wipe as long as it remains wet.
 - Record that temperatures are normal or not, with names & date on form provided.
